

Always protecting your MRI facility – Ferroguard® Assure

Ferroguard Assure will
provide you with confidence
in your MRI projectile safety

Ferroguard Assure is recognized to be the most trustworthy ferromagnetic detection system (FMDS) for MRI Zone IV protection. Ferroguard Assure provides you with clear, simple, early warning of risk items approaching the magnet room, together with lowest audible alarm rates.

Trustworthy detection

Gives you confidence that your FMDS will do its job when it really matters. Ferroguard Assure is always on, always detecting, providing you time to react to prevent an incident.

Clear, simple alerts

Intuitive, eye-level, traffic light displays alert you to approaching risk items.

Smart audible-alert reduction

Ferroguard Assure's Smart Alarm™ can reduce audible alerts by 85%.* Never an alarm on exiting the room, or through door movement. It enables improved safety and workplace effectiveness with the lowest probability of alarm fatigue.

Designed for your facility

Constructed from ruggedized aluminum, built to survive the inevitable gurney collisions. Elegant styling, with a versatile design that enables optimal deployment for every layout.

Entirely passive

Completely safe to use with all patients, including those with implants.

Protect all your patients

Ferroguard Assure will protect your non-ambulatory patients too, using Ferroguard-approved Zero-Magnetic™ patient transfer equipment.

The quality you expect

Ferroguard are the only FMDS systems designed under ISO9001 international quality standards.

Trustworthy, clear detection of ferromagnetic hazards, before reaching Zone IV

Eliminates catastrophic accidents caused by medium to large ferromagnetic items.

Always detecting before, not beyond the door

Ferrogaurd Assure is always mounted in Zone III, outside the door, even with outswing doors. Only FMDS mounted outside the door will always provide clear, uninterrupted warning of risk items before they enter the room.

Visual Early Warning (ViEW®) technology gives you time to react and to prevent an accident.

Fewer audible alerts mean more effective protection

Ferrogaurd Assure sets a new standard in audible-alert reduction. Work with Ferrogaurd Assure to achieve improved safety and workplace effectiveness, with the lowest probability of alarm fatigue.

More than world-leading technology

At Metrasens we understand that the product hardware is only half the story. You can have confidence that our network of certified Ferrogaurd engineers will be expertly installing your patient safety systems and supporting you for years to come.
