SEEING WHAT MATTERS

# NO-FRILLS FEATURES FOR CLEAR RESULTS

## Fully-automated lesion classification

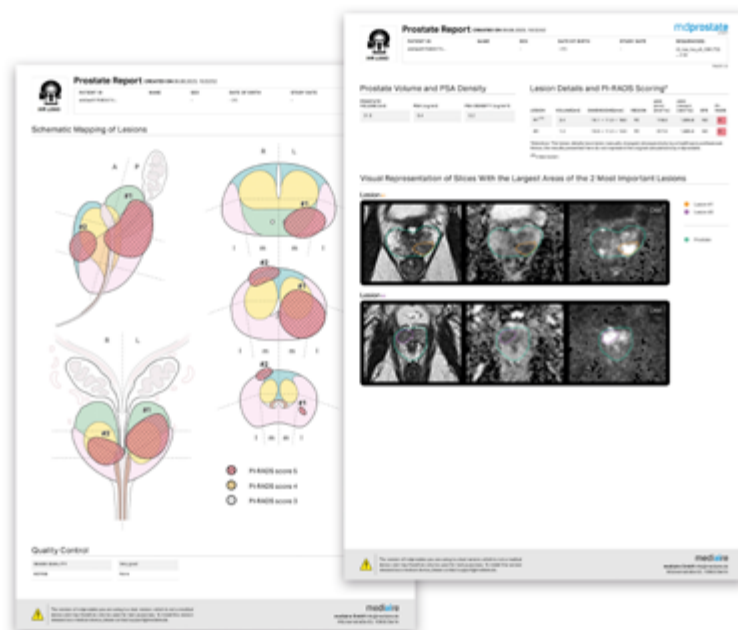

Get a detailed evaluation of automatically detected and classified lesions with parameters such as region, volume, dimensions and ADC values incl. the PI-RADS 2.1 score.

## Automated longitudinal assessments

Experience the first AI-based prostate tool with longitudinal assessments. Easily compare the previous evaluation with the current, integrated into one report (available with version 1.3 or higher).

## Save time with our reports

Automated visualizations of all lesions ( $\geq$  PI-RADS 3) are integrated in a schematic sector map in all reports. Our editing functions enable you to adjust, in case you'll ever need it.

0

*Zero clicks – speed up your workflow*

Automated analysis & report generation with full PACS integration for a lean workflow.

1

*One automated report – no tedious manual steps*

All data summarized in one report, generated in less than three minutes, including schematic visualizations.

2

*Two opinions – peace of mind for patients & you*

AI lends you a second pair of eyes for detailed and accurate quantitative analysis, for more informed conclusions.
